ANMA 45th ANNUAL CONVENTION

***Dr. Richard Drucker
President***

WELCOME FROM THE PRESIDENT

Welcome to the 45th Annual Convention & Educational Seminar of the American Naturopathic Medical Association! I'm Dr. Richard Drucker, and it is my sixth year serving as President. I've been honored to be part of ANMA since 1999, bringing decades of experience and a lifelong passion for advancing naturopathic medicine.

My own health challenges from a young age set me on a journey to find lasting solutions, one that led me to understand the vital role of high-quality, optimal nutrition. This passion guided my academic path, earning a Bachelor of Science from Indiana University, followed by a Master of Science in Natural Health, a Doctorate in Naturopathy, and a Doctorate in Natural Health with a specialty in Natural Immunology from Clayton College of Natural Health. In 1999, I founded Drucker Labs, which has since become a trusted name in developing exceptional, organically bound nutritional products.

We are proud of the excitement generated by successfully Promoting and Protecting Naturopathy for 45 years and beyond. This past year has been one of growth, connection, and renewed momentum for ANMA. Together, we have continued to protect the rights of practitioners, uphold the definition of naturopathy, and defend the public's right to choose natural health care. These principles are the foundation of our work — and the reason we gather here each year.

I invite you to make the most of your time at the convention: connect with colleagues, explore new ideas, and be inspired by the expertise in every room. And please join us at the Members Award Luncheon, where we will celebrate those whose dedication and contributions help shape the future of our profession.

On behalf of the Board of Directors, I welcome you and I look forward to meeting many of you throughout the weekend.

In Loving Memory

ANMA and the naturopathic profession lost colleagues and supporters this year. It is with great sadness that ANMA says goodbye to its dear friends. You will be greatly missed.

His health axioms are: lead by example, teach only empirical truth, heal those who ask, dispel the lies of healthcare and stop man's decline into the torment of drugs and surgery. Mr. Bezanis is guided by three basic principles, 1) Anyone can heal, 2) Healing starts with education and taking personal responsibility, 3) Exact diagnosis leads to right solutions, which lead directly and only to healing results.
